Practitioners have feelings, too.

Now there are two DVD sets!!

When it comes to creating secure and trusting relationships with families, infant and family practitioners are pros. But what happens when cases awaken thoughts and feelings in you as a professional?

In each of these 2-DVD training sets you’ll explore Reflective Supervision through 4 unrehearsed sessions between infant and family professionals and their Reflective Supervisors. You’ll see how Reflective Supervisors create a safe environment for staff to have and explore feelings about their work with very young children and families who are often times enduring very difficult circumstances.

Reflective Supervision features supervision with mental health practitioners. Reflective Supervision II features other early intervention home visitors. Both DVD sets include sample discussion questions.
