Learning and Growing Together

MI-AIMH believes that each infant needs to be nurtured and protected by one or more caregivers, most often the parents, who enjoy a permanent and special relationship with the baby. This sustained, primary relationship provides the essential and necessary context within which every human infant learns basic emotional, cognitive and social attitudes that will influence the course of development.

Medical excellence.
Made for **kids**.

Treating a child is not the same as treating an adult. This simple fact led to the creation of the largest, most advanced children's hospital in West Michigan—where more than 50 pediatric specialties and programs meet the unique needs of kids, from infancy to age 18. For parents and children alike, there's no place quite like it. **Helen DeVos Children's Hospital.** Creating greater possibilities for kids.
